

**6th International
LS-DYNA Users Conference**
Simulation 2000

Co-sponsored by
Engineering Technology Associates (ETA)
and
Livermore Software Technology Corporation

April 9-11, 2000
Dearborn, Michigan

Mailing Address:

Livermore Software Technology Corporation
2876 Waverley Way
Livermore, California 94550-1740

Support Address:

Livermore Software Technology Corporation
7374 Las Positas Road
Livermore, California 94550

TEL: 925-449-2500
FAX: 925-449-2507
EMAIL: sales@lstc.com

Table of Contents

Session 1. Keynote Addresses. Chair: Arthur Tang (ETA)

Dr. Jack Thompson, Director of CAE and Simulation, DaimlerChrysler

Teraflops and Beyond, Dr. Robert F. Lucas, Head, High Performance Computing Research, Lawrence Berkeley National Laboratory

Session 2. Plenary Session 1 – Worldwide Automotive Applications.

Chair: Joe Hassan (DaimlerChrysler)

- A. Analytical Road Loads and Proving Ground Simulation in LS-DYNA Using Component Mode Synthesis** 2-1
Dave Benson (University of California at San Diego); John O. Hallquist (LSTC)
- B. Accurate and Detailed LS-DYNA FE Models of the US- and EUROSID: A Review of the German FAT Project** 2-3
Ulrich Franz, Oliver Graf (CAD-FEM GmbH); Andreas Hirth, Matthias Walz (DaimlerChrysler AG)
- C. Making FEM Tire Model and Applying It for Durability Simulation**2-21
Masaki Shiraishi, Hiroshi Yoshinaga, Naoaki Iwasaki (Sumitomo Rubber Industries, Ltd.); Kimihiro Hayashi (Japan Research Institute)

Session 3. Crash 1. Chair: Majeed Bhatti (General Motors Corporation)

- A. On Applications of Adaptive Strategies for General Shell Structures in Crashworthiness Analysis Using LS-DYNA** 3-1
Karl Schweizerhof, T. Münz, O. Graf, and M. Walz (CAD-FEM GmbH); Chen Tsay, J.O. Hallquist (LSTC)
- B. Validated Crash Simulation of the Most Common Guardrail System in the USA** 3-13
Ala Tabiei and Jin Wu (University of Cincinnati)
- C. Virtual Proving Ground – A CAE Tool for Automotive Durability and NVH Applications** 3-31
Arthur Tang, Nasser Tamini, and David Yang (ETA)
- D. Pedestrian Protection: Use of LS-DYNA to Influence Styling and Engineering** 3-51
Bhavik R. Shah and Richard M. Sturt (Ove Arup & Partners); Aram Kasparian (Design Research Associates Ltd. – Arup)
- E. Vehicle Dynamic Simulation Using A Non-Linear Finite Element Simulation Program (LS-DYNA)** 3-61
G.S. Choi and H.K. Min (Kia Motors Technical Center)

Session 4. Crash 2. Chair: Karl Schweizerhof (CAD-FEM GmbH)

- A. Polyurethane Material Models for Simulating Leg-Form Impact in Explicit Transient Dynamics** 4-1
Joe Hassan (DaimlerChrysler); Peter Schuster, G. Frederick (Ford Motor Co.)
- B. Integration of Finite Element Analysis (LS-DYNA) with Rigid Body Dynamics (ATB) for Crash Simulation** 4-13
B.V. Mehta, S.H. Chen, S. Patlu, P.N. Petkar, R.L. Williams (Ohio University); L.P. Bindeman (LSTC); J.M. Kennedy (KBS2); J. Pelletiere (WPAFB)
- C. Application of LS-DYNA and MADYMO Coupled Model for Simulating an Offset Frontal Crash Scenario** 4-21
T.J. Gundasekar, Mostafa Rashidy (EASi Engineering); Norman Ludtke (Ludtke Engineering); Bruce Spinney (NHTSA)
- D. Parameter and Optimization Studies for Crashworthiness Design using LS-DYNA and the Altair StudyWizard**4-27
Uwe Schramm, H. Thomas, K. Hayes (Altair Engineering Inc.)
- E. Modeling Connections in Roadside Safety Devices Using LS-DYNA: Detailed and Approximate Methods** *
- A.Y. Abu-Odeh and Roger P. Bligh (Texas A&M University)*

Session 5. Crash 3. Chair: Y.C. Deng (General Motors Corporation)

- A. Simulation of Structural Latches in an Automotive Seat System Using LS-DYNA** 5-1
Tuhin Halder (Lear Corporation)
- B. Finite Element Modelling of Biomechanical Dummies – The Ultimate Tool in Anti-Whiplash Safety Design?** 5-9
Waldemar Z. Golinski and Richard Gentle (The Nottingham Trent University)
- C. A Virtual Bumper Test Laboratory for FMVR 581** *
- Tom Mase (Acushnet Golf Co.); J.T. Wang, R.R. Mayer, L. Pachon (Vehicle Analysis and Dynamics Lab.); K. Bonello (MidLux Car Group, Flint, General Motors Corporation)*
- D. New Techniques for Airbag Modelling** *
- T. Keer, Miles Thornton, Richard Sturt (Ove Arup & Partners)*

Session 6. Theory 1. Chair: Clifford Chou (Ford Motor Company)

- A. Development of a Wood Material Model for Roadside Safety Applications** ... 6-1
Yvonne D. Murray (Aptek Inc.)
- B. Implementation of a User Material Routine in LS-DYNA for Viscoelastic Modeling and Simulation of Highway and Airport Pavements** 6-11
Waheed Uddin and L.M. Ricalde (University of Mississippi)

- C. Implementation of Constitutive Equations for Viscoplasticity with Damage and Thermal Softening into the LS-DYNA Finite Element Code, with Application to Dynamic Fracture of Ring-Stiffened Welded Structures 6-25**
Ricardo F. Moraes and Donald W. Nicholson (University of Central Florida)
- D. A Parallel Numerical Procedure for the Solution of Contact-Impact Problems ***
Larsgunnar Nilsson and Per Persson (Engineering Research AB)

Session 7. Theory 2. Chair: Larsgunnar Nilsson (ERAB)

- A. New Nonlinear Higher Order Shear Deformation Shell Element for Metal Forming and Crashworthiness Analysis.**
- Part I. Formulation and Finite Element Equations 7-1**
Ala Tabiei and Romil Tanov (University of Cincinnati)
- B. (Ibid): Part II. Performance Validation through Standard Tests 7-17**
(Ibid)
- C. Smooth Particle Hydrodynamics (SPH): A New Feature in LS-DYNA7-29**
Jean Luc Lacome (DynaLis)
- D. Finite Element Modeling of Co-Mingled Glass/Thermoplastic Fabrics for Low-Cost/High-Volume Composites Manufacturing 7-35**
Patricia P. Buso, James A. Sherwood, Julie Chen
(University of Massachusetts – Lowell)

Session 8. Theory 3. Chair: Brian Walker (Ove Arup & Partners)

- A. A Simple Correction to the First Order Shear Deformation Shell Finite Element Formulations 8-1**
Romil Tanov and Ala Tabiei (University of Cincinnati)
- B. New Formulation for Composite Sandwich Shell Finite Element 8-9**
(Ibid)
- C. Eight -Node Solid Element for Thick Shell Simulations 8-27**
Yong Guo (LSTC)
- D. Use of LS-DYNA Shell Elements in the Analysis of Composite Plates with Unbalanced and Unsymmetric Layups 8-47**
Saiphon Charoenphan, Lawrence C. Bank, Michael E. Plesha
(University of Wisconsin – Madison)
- E. Micromechanics Based Composite Material Model for Impact and Crashworthiness Explicit Finite Element Simulation 8-57**
Ala Tabiei and Quing Chen (University of Cincinnati)

Session 9. Impact 1. Chair: Woosik Chung (Theme Engineering)

- A. Comparison of Two Modeling Approaches for Thin-Plate Penetration Simulation** 9-1
Norman F. Knight, Jr. (Veridian-MRJ); Navin Jaunky (Eagle Aeronautics); Robin Lawson (FDC/NYMA); Damodar Ambur (NASA Langley)
- B. Fan Blade Bird-Strike Analysis and Design** 9-13
Thomas J. Vasko (Pratt & Whitney)
- C. Analysis of a Propane Tank Truck Impacting a Concrete Column Using LS-DYNA** 9-19
Clayton F. Heberling (Pressure Sciences, Inc.)
- D. Effects of Initial Geometrical Imperfection on Square Tube Collapse** 9-31
Liang Xue, Zhongqin Lin, Zhengxu Jiang (Shanghai Jiao Tong University)
- E. Impact Analyses of Nuclear Waste Vessel** *
- Feng Mu, Jiri Dobias, and Jiri Plesek (Academy of Sciences of the Czech Republic)*

Session 10. Impact 2. Chair: Mitsuhiro Makino (Fujitsu Ltd.)

- A. A Comparison between Experimental Testing and Numerical Simulations of Impact Loading on Aluminum and Magnesium Steering Wheel Armatures** 10-1
William Altenhof (University of Windsor) and William Ames (KS Centoco Ltd.)
- B. A Validation Case Study: Steel Billet Drop Tests and Simulations as Reported in NUREG/CR-6608** 10-17
Leonard E. Schwer (Schwer Engineering & Consulting Services); James M. Kennedy (KBS2, Inc.)
- C. Sidewall Indentation and Buckling of Deformed Aluminum Beverage Cans** 10-27
Robert W. Bielenberg, Scott H. Magner, John D. Reid (University of Nebraska – Lincoln)
- D. Piercing of Aluminum Beverage Cans** 10-41
Brian A. Coon, Phanidhar Anugonda, John D. Reid (Univ. of Nebraska-Lincoln)

Session 11. Impact 3. Chair: Akbar Farahani (ETA)

- A. Preliminary Study of the Behavior of Composite Material Box Beams Subjected to Impact** 11-1
Jason R. Smith, Lawrence C. Bank, and Michael E. Plesha (University of Wisconsin – Madison)
- B. Global and Local Coupling Analysis for Small Components in Drop Simulation** 11-17
Jason Wu (Motorola)

- C. Using LS-DYNA to Develop a Baseball Bat Performance and Design Tool ***
James Sherwood and Timothy J. Mustone (University of Windsor)
- D. Damage Model for Brittle Rocks under Dynamic Loading and Application to Rock Fragmentation by Blasting ***
Gary Ding, Q.K. King, Dakin Cao (Beijing Software Technology Co. Ltd.)

Session 12. Metal Forming 1. Chair: Frank Marx, ANSYS Inc.

- A. Input Parameters for Metal Forming Simulation Using LS-DYNA 12-1**
Bradley N. Maker and Xinhai Zhu (LSTC)
- B. Springback in High Strength Anisotropic Steel 12-13**
Oladipo Onipede Jr. and Carlos J. Gomes (University of Pittsburgh)
- C. The Effects of Forming and Parameter Mapping on Further Simulation .. 12-23**
Brian Cowell, Anthony Kellicut, Adam Fisher (Tower Automotive)
- C. Anisotropic Behaviors and Its Application on Sheet Metal Stamping Processes 12-29**
Weilong Hu and Jeanne He (ETA)

Session 13. Metal Forming 2. Chair: Heitaro Doi (Japan Research Institute)

- A. Computer Simulation of Sheet Metal Forming and Drawbead Effects Using eta/DYNAFORM 13-1**
Yinghong Peng, Zhaoyuan Wang, Xiongfei Yin, Xueyu Ruan (Shanghai Research Institute of Tool & Die)
- B. Adaptive Finite Element Simulation of Sheet Metal Forming Processes Using Gradient Based Indicators 13-9**
Ramin Moshfegh, Xiangdong Li, Larsgunnar Nilsson (Linkoping Institute of Technology)
- C. Study on the Effects of Numerical Parameters on the Precision of Springback Prediction 13-25**
Zhongqin Lin, Gang Liu, Weili Xu, Youxia Bao (Shanghai Jiao Tong Univ.)
- D. Springback Simulation of a High Strength Steel Rail Stamped by Crash Form With Pad Process ***
Changqing Du (DaimlerChrysler); Hua-Chu Shih, Jian An (Altair Engineering); Sheng-Dung Liu (National Steel); Xinhai Zhu (LSTC)

Session 14. Metal Forming 3. Chair: Li Zhang (DaimlerChrysler)

- A. Simulation of Cold Roll Forming of Steel Panels 14-1**
Fei-chin Jan and Oladipo Onipede Jr. (University of Pittsburgh)

B. Equivalent Drawbead and its Application in Optimization of Autobody Forming Process	14-13
<i>Xionghui Zhou, Ziqiang Liu, Zijie Zhang, Junyue Zhang</i> <i>(Shanghai Jiao Tong University)</i>	
C. Aid Design Die of Auto-Body Using Numerical Simulation of 3-D Sheet Metal Forming Processes	14-19
<i>Ning-an Hu (Yuejin Automobile Group Corp. Tool Plant) and</i> <i>Ning-yan Zhu (Nanjing Iveco Ltd.)</i>	
D. Educational and Research Issues Concerning Virtual and Real Forming of Sheet Metal	14-27
<i>Raghu Echempati and Sarang Likhite (Kettering University)</i>	

Session 15. Emerging Technologies 1. Chair: R.J. Yang (Ford Motor Company)

A. A Toolbox for Validation of Nonlinear Finite Element Models	15-1
<i>Mark C. Anderson, Timothy K. Hasselman (ACTA Inc.);</i> <i>John E. Crawford (Karagozian & Case Structural Engineers)</i>	
B. Simulating the Motion of Heart Valves Under Fluid Flows Induced by Cardiac Contraction	15-13
<i>Eann A. Patterson, C.J. Carmody, Ian C. Howard (University of Sheffield)</i>	
C. Simulation and Validation of UNDEX Phenomena Relating to Axisymmetric Structures	15-21
<i>R. Boyd (Altair Engin. Ltd., UK); R. Royles (University of Edinburgh);</i> <i>K.M.M. El-Deeb (Linear & Non-linear Structural Dynamics Ltd.)</i>	
D. ALE and Fluid-Structure Interaction Capabilities in LS-DYNA	15-37
<i>Lars Olovsson (LSTC) and M'hamed Souli (Universite d'Artois)</i>	
E. Virtual Reality Visualization (VRV) of Realistic Weapons Effects Predicted Using LS-DYNA	15-47
<i>David W. Nicholson, Ricardo F. Moraes (University of Central Florida);</i> <i>Eduardo Divo, Brian Cahill (Dual Inc.)</i>	

Session 16. Emerging Technologies 2. Chair: Jean-Michel Terrier (Dynalis)

A. Optimization of Nonlinear Dynamical Problems Using Successive Linear Approximations in LS-OPT	16-1
<i>Nielen Stander (LSTC); Rudolf Reichert, Thomas Frank (DaimlerChrysler AG)</i>	
B. High Efficient and Powerful Integrated Design Support System "DYNA-Works"	16-15
<i>Fuminori Oshita and Osamu Kunieda (Japan Research Institute, Ltd.)</i>	

C. Simulation of Falling Weight Deflectometer for In-situ Material Characterization of Highway and Airport Pavements	16-21
<i>Waheed Uddin (University of Mississippi)</i>	
D. The New Incompressible Flow Capabilities in LS-DYNA	16-33
<i>Mark A. Christon (LSTC)</i>	
E. Nonlinear Analysis of Copper Water Stop	16-47
<i>Lou Pingyi, Cao Deqing (Beijing Engineering Software Technology Co. Ltd.)</i>	

Session 17. Computing. *Chair: John Shen (DaimlerChrysler)*

A. Partitioning Effects on MPI LS-DYNA Performance	17-1
<i>Jeffrey G. Zais (IBM)</i>	
B. A Performance Study of LS-DYNA on Vehicle Crash Simulation	17-17
<i>Yih-Yih Lin (Hewlett-Packard Co.) and Cing-Dao Kan (NCAC)</i>	
C. Scaling Study of LS-DYNA MPP on High Performance Servers	17-25
<i>Youn-Seo Roh (Sun Microsystems, Inc.)</i>	
D. Scalability of LS-DYNA on SGI Systems	17-35
<i>Roger Chu and Guangye Li (SGI)</i>	
E. Barrier Breaking Performance of LS-DYNA on NEC Supercomputers	*
<i>Dennis Lam and Gregg Skinner (NEC Systems)</i>	

Session 18. Plenary Session 2 – Optimization and MPP Applications.

Chair: Henry H. Fong (Fujitsu/HAL Computer Systems)

A. Shape Optimization of Instrument Panel Components for Crashworthiness Using Distributed Computing	18-1
<i>Alex Akkerman (Ford Motor Company); Mike Burger (LSTC); Bob Kuhn, Hrabri Rajic (Kuck & Associates, Inc.); Nielen Stander (LSTC); Ravi Thyagarajan (Ford Motor Company)</i>	
B. Design Optimization of the Beagle II Mars Lander Airbags Through Explicit Finite Element Analysis – An Update	18-15
<i>Anthony P. Taylor (Irvin Aerospace Inc.)</i>	
C. Message Passing and Advanced Computer Architectures	18-29
<i>Brian Wainscott and Jason Wang (LSTC)</i>	
D. Evaluation of Performance, Reliability, and Consistency of MPP Version of LS-DYNA	18-35
<i>Cing-Dao Kan (NCAC) and Yih-Yih Lin (Hewlett-Packard Company)</i>	

Session 19. Panel on “HPC/MPP for Future CAE Solutions”.

Chair: Dr. Robert Lucas (Lawrence Berkeley National Laboratory)

Panelists:

- *Mr. Bill Blake* – Vice President, High Performance Technical Computing, Compaq Computer Corporation
- *Mr. Knute Christensen* – MCAE Business Development Manager, Hewlett-Packard Company
- *Dr. Samad Moini* – World Wide Engineering Segment Manager, IBM Corporation
- *Mr. Paul Chermak* – Vice President of Solutions Marketing, SGI
- *Dr. A. J. Mahajan* – Manager, HPC, Sun Microsystems

Session 20. LS-DYNA v. 950/960 and Beyond

Dr. John O. Hallquist (LSTC)
